UC and the left

Re "Little evidence of UC
'crisis,' " Editorial, April 7

It is difficult to compile evidence of professors' leftist propaganda because students rely on these instructors for their grades. However, there is evidence that the faculties at University of California campuses consist overwhelmingly of liberals.

Due to my interests and donations to the UC system, I have gone to countless events, talks and classes. I know numerous professors well and am involved with UC student organizations.

I am a Jewish entrepreneur who succeeded as a furniture manufacturer, starting with \$450 in 1972 in Los Angeles. The hostility found in UC classrooms to business, conservatives and Israel is extraordinarily damaging to students and all our futures.

HOWARD WALDOW
