Thank you for responding. I did read the documentation you linked to; it's why I reached out to you. You seem to be one of the few people that care enough to try and get the truth out there. Most people don't seem to care until they are personally impacted.

In the case of Parker, I believe one of the techniques that he has used to enrich himself is to take advantage of government contracts. (if you didn't know he resides at 901 N Camden, Beverly Hills). Google maps show it as Central African Republic; I believe he is the honorary consulate general. Probably comes with some tax benefits or something. Anyway, as the Times article states Parker sold bogus chemicals to the County, hyping its green qualities. One of the reasons he claimed his products were better than others was because it was "certified" by the AQMD, while other similar products were not. Parker somehow developed a personal relationship with Erbie Phillips, a probation director who was able to write customized specifications for the purchase of cleaning products for the department. Every medical person involved in the treatment of probation minors objected as MRSA and ORSA cases spiked in juvenile facilities because the staff couldn't disinfect the living areas with the bogus cleaners.

Phillips also steered a lucrative CCTV camera deal to Spectrum Surveillance dba View Park Estates, another Parker company. All told, the department spent over \$10 million over several years on cameras that didn't work and cleaners that didn't clean.

I believe Parker also has stepped into the charter school business. After all, if you are going to get rich off of government entities where better to find lax fiscal oversight than school districts. He owns a business called Golden Day preschools which I believe he leveraged into an Inglewood Charter school.

Anyway, lots to work on with him but I am not familiar with the others but I am sure that they too are using the "green" fog to find ways to line their pockets with misspent public monies.

I appreciated what you are doing. Let me know how to help.

Dear Bob,

Very interesting article: **Second major vendor named in Probation Department investigation: A criminal inquiry into whether a department director steered contracts to specific companies has expanded, targeting two firms owned by the same L.A. businessman** (Clark E. Parker). [July 21, 2010](http://www.latimes.com/2010/jul/21/local/la-me-probation-20100721) | By Garrett Therolf, Los Angeles Times
<http://articles.latimes.com/2010/jul/21/local/la-me-probation-20100721>

If you have not done so, please read my full analysis of "Dr. Doctor" Parker's academic credentials: July 19, 2013 Enstrom and Malkan Statements to SCAQMD Mobile Source Committee re Qualifications of Board Members Parker and Lyou (<http://www.scientificintegrityinstitute.org/AQMD071913.pdf>). Also, read this "anonymous" July 17, 2013 SCAQMD Fact Sheet Describing Serious Problems with SCAQMD Board Members and Air Pollution Science (<http://www.scientificintegrityinstitute.org/AQMD071713.pdf>).

I really can use your help in exposing the misrepresentations and conflicts of interest of "Dr. Doctor" Parker and other SCAMQD Board Members. SCAQMD needs ethical and honest Board Members who do not have conflicts of interest. Please help me--there are ways you can do this without exposing yourself. California can be fixed, but only if enough people have the courage to fix it.

I have always admired your investigative journalism. Please give my regards to Carl Bernstein.

Best regards,

James E. Enstrom, Real Ph.D. from Stanford

At 08:50 PM 6/4/2014, you wrote:

Dr. Enstrom, with regards to Clark Parker, why dont you ask him why his company, Natural Solutions, is on the SCAQMD website as an approved vendor for "green products". No conflict of interest? Also, google Clark Parker and Erbie Phillips to see how they scammed LA County out of \$10+ million dollars of nonsense green cleaning products.

Keep up the good work but you are only hitting upon the tip of the iceberg. I have attached a link to a website that still has this information as the SCAQMD website seems to have taken it down.
