**Bill Prohibits EPA from Using Secret Science**

**Washington, D.C.** Members of the House Committee on Science, Space, and Technology today introduced the *Secret Science Reform Act of 2014* ([H.R. 4012](#)), a bill to prohibit the EPA from proposing regulations based upon science that is not transparent or not reproducible. The bill was introduced by Environment Subcommittee Chairman David Schweikert (R-Ariz.) and cosponsored by Chairman Lamar Smith (R-Texas).

**Chairman Smith:** "Virtually every regulation proposed by the Obama administration has been justified by nontransparent data and unverifiable claims. The American people foot the bill for EPA's costly regulations, and they have a right to see the underlying science. Costly environmental regulations should be based on publicly available data so that independent scientists can verify the EPA's claims. The Secret Science Reform Act of 2014, which I sponsored, prohibits EPA from using secret science to justify new regulations."

**Chairman Schweikert:** "The Secret Science Reform Act ends costly EPA rulemaking from happening behind closed doors and out of public view. Public policy should come from public data, not based on the whims of far-left environmental groups. For far too long, the EPA has approved regulations that have placed a crippling financial burden on economic growth in this country with no public evidence to justify their actions. This common-sense legislation forces the EPA to be transparent and accountable with their findings."

A 2013 poll from the Institute of Energy Research found that 90 percent of Americans agree that studies and data used to make federal government decisions should be made public. Provisions in the bill are consistent with the White House's scientific integrity policy, the President's Executive Order 13563, data access provisions of major scientific journals, the Bipartisan Policy Center and the recommendations of the Obama administration's top science advisors.

On Tuesday February 11 at 10:00am the Environment Subcommittee will hold [a hearing](#) titled, "Ensuring Open Science at EPA" to receive testimony on the legislation.

Along with Chairmen Smith and Schweikert, the following Science Committee members are original cosponsors: Rep. Jim Bridenstine (R-Okla.), Oversight Subcommittee Chairman Paul Broun (R-Ga.), Research and Technology Subcommittee Chairman Larry Bucshon (R-Ind.), Rep. Chris Collins (R-N.Y.), Rep. Kevin Cramer (R-N.D.), Chairman Emeritus Ralph Hall (R-Texas), Rep. Randy Hultgren (R-Ill.), Energy Subcommittee Chairman Cynthia Lummis (R-Wyo.), Rep. Randy Neugebauer (R-Texas), Vice Chairman Dana Rohrabacher (R-Calif.), and Rep. Randy Weber (R-Texas)
